What can you see in the sky?

In the daytime, the sky is light.  
I see the birds and airplanes.

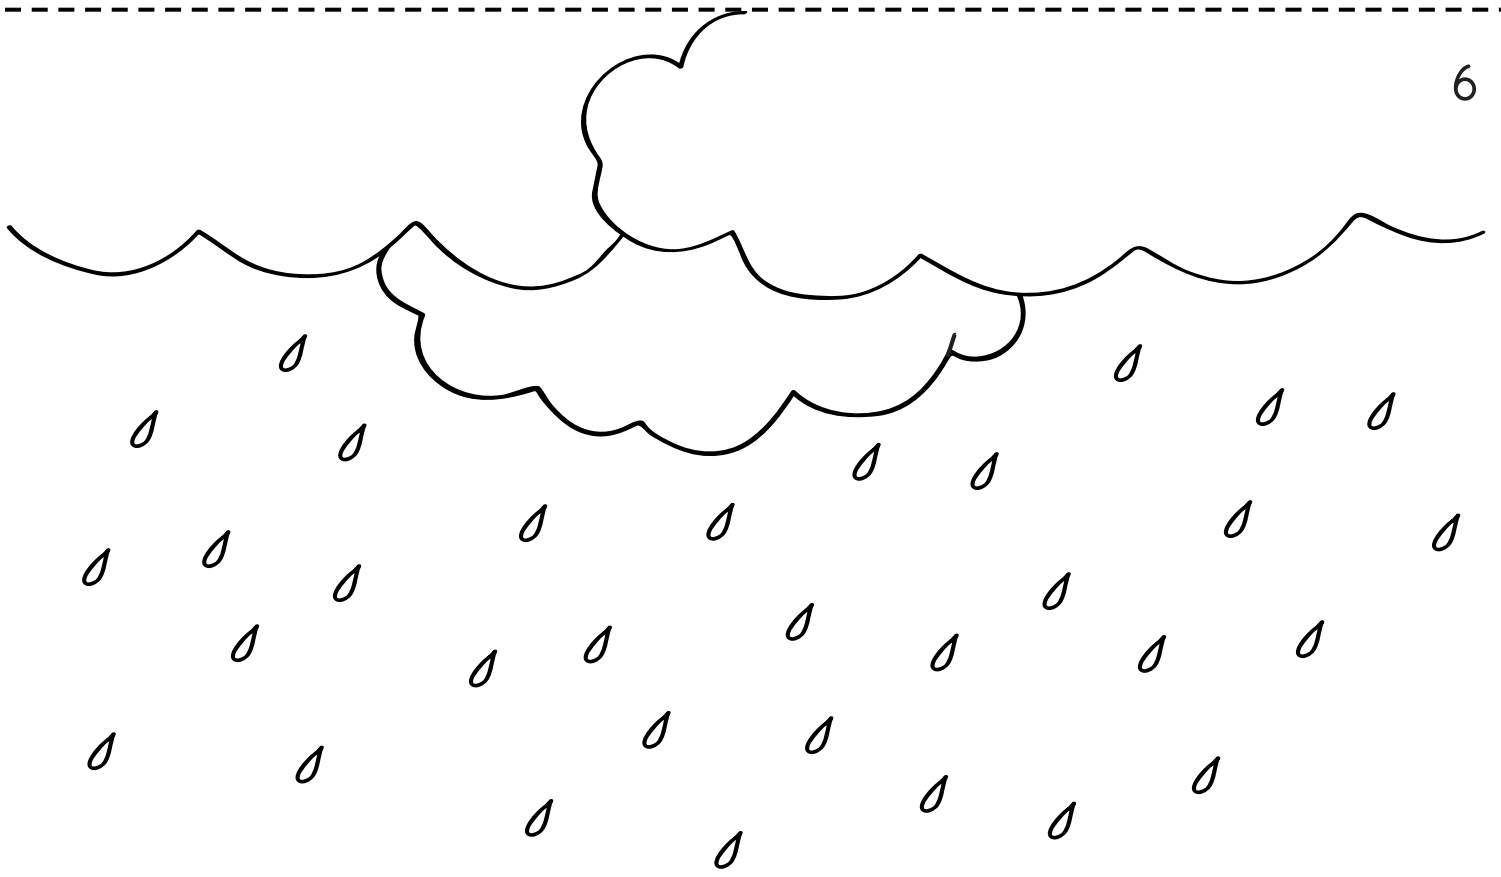

I see the round sun shining in the sky.

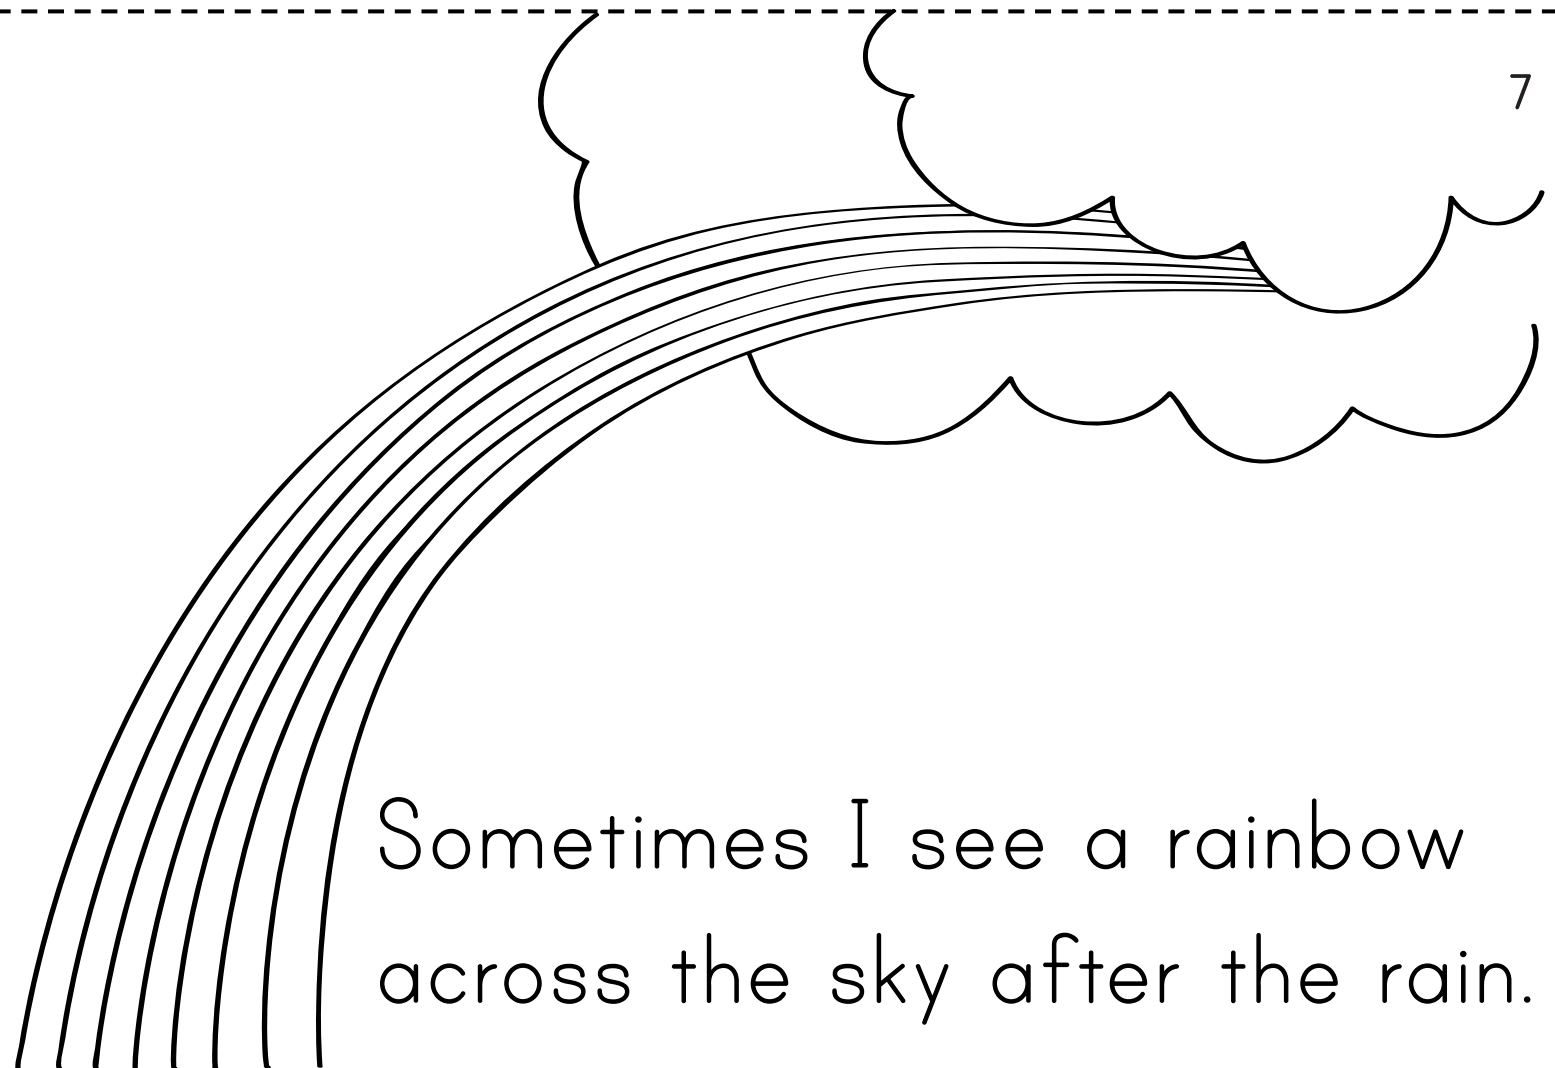

I see the fluffy white clouds  
floating by.

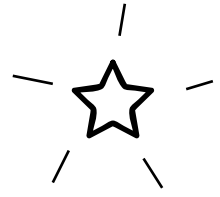

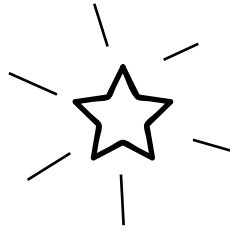

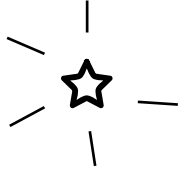

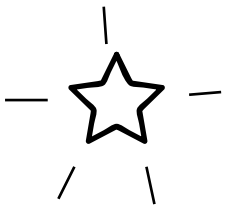

Sometimes the dark clouds bring snow.

Sometimes they bring rain.

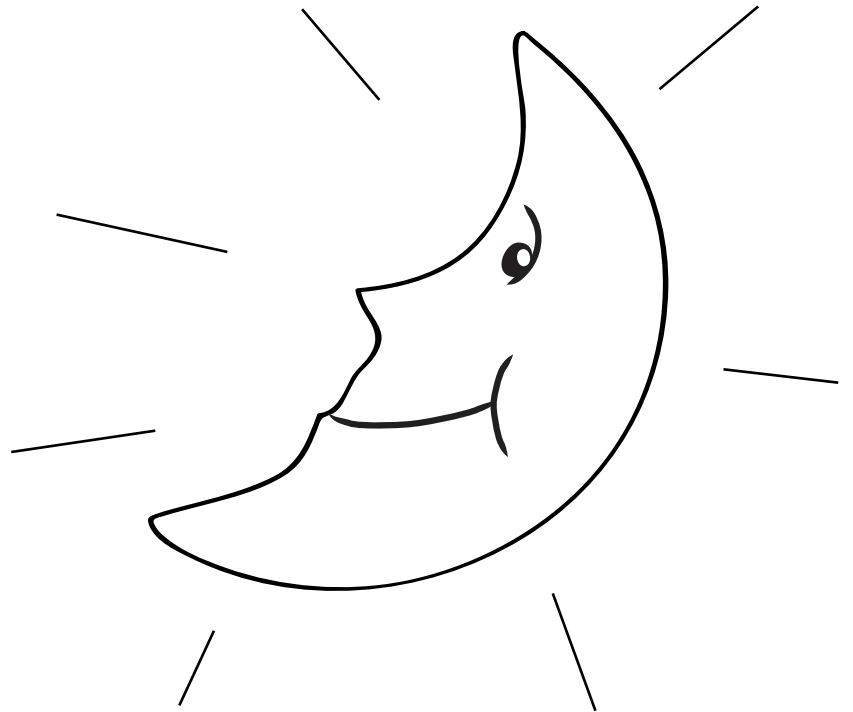

Sometimes I see a rainbow  
across the sky after the rain.

At night, the sky is dark.

I see the stars twinkling above.

I see the bright moon looking down  
at me.

There are many things in the sky.  
I love the sky, day and night.
